Good support is a marketing point. If you do it well, clients will come to appreciate it. And a well-rounded developer with communication skills and domain knowledge is capable of doing this well. However, I would still prefer that applications be of high enough quality that they don't need support.

Should software engineers also act as tech support?

Application software (app for short) is a program or group of programs designed for end users. Examples of an application include a word processor, a spreadsheet, an accounting application, a web browser, an email client, a media player, a file viewer, simulators, a console game or a photo editor. The collective noun application software refers to all applications collectively.

Application software - Wikipedia

Definition. In 1961, the Conference of Engineering Societies of Western Europe and the United States of America defined "professional engineer" as follows: A professional engineer is competent by virtue of his/her fundamental education and training to apply the scientific method and outlook to the analysis and solution of engineering problems.
