The engine in your 2000 GMC Sierra 2500 3/4 Ton 4WD - Pickup may make the power, but it is the transmission (or transaxle) that sends it to rest of the driveline. With an automatic transmission (AT) the

torque converter and flexplate are responsible for transferring the rotating engine power to the transmission.

2000 GMC Sierra 1500  
I love my truck!  
However, GMC's are  
known for electronics  
issues. But I have the  
5. 3l v8 engine which

has been eternally  
faithful with almost  
300k miles on it.  
Everything else will fail  
before that engine ever  
gives out! I  
recommend this  
vehicle for everyone  
looking for a reliable  
vehicle, but only if you  
get the 5. 3l v8.

Re: 2000 gmc sierra  
1500 Aug 31 2018,  
4:37am It has 226,176  
miles on it.the first  
time it the rear end  
made the humming  
sound they said it was  
cause it didn't have  
any gear oil in it and it  
mess the rear end up,  
they didn't say if it  
burnt the rear end  
up.just they had to  
take the tires off to fix  
it.now with less than  
4000 miles on the  
pinion seal since I got  
it back from them, it's  
leaking ...

### **Transmission & Drivetrain Parts for 2000 GMC Sierra 1500 ...**

The GMC Sierra utilizes  
a crankshaft position  
sensor in order to  
regulate the engine  
timing. This sensor  
uses a reluctor to  
gauge the position of  
the crank. When the  
Sierra's ECM  
determines that there  
is an issue with the  
signal coming from this  
sensor, it'll throw the  
P0335 trouble code..  
P0335 Symptoms: GMC  
Sierra

GMC Sierra P0171 Causes. There are many things that can cause the P0171 trouble code on the GMC Sierra. The most common problem is far and away the first one listed below. Vacuum

Leaks- With the GMC Sierra, the most common cause for the P0171 code to show is a vacuum leak. Take a look around and see if you can find the vacuum leak.

**P0171 GMC Sierra Diagnosis and Meaning | Drivetrain Resource**

One of the most serious issues that can happen to your GMC Sierra's engine is if it ends up with low oil pressure. Low oil pressure will cause the engine to seize up. When the oil pressure light on, it should be assumed that the engine locking up is imminent.
