Challenges in Language Testing Around the World

Insights for language test users *Springer Nature*

This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the

world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

Intermediality

Teachers' Handbook Of Critical Media Literacy *Routledge*

With the ever-growing proliferation of electronic and other popular media, the complexity of relationship between what students see and hear, what they believe and how they interact with one another underscores now, more than ever, the need for across-the-curriculum teaching of critical thinking, critical reading, and critical viewing skills. The emerging consensus is that teaching critical viewing skills bolsters students' abilities in traditional disciplines, combats problems of youth apathy, violence, and substance abuse, and improves students', parents, and teachers' attitudes toward school. Intermediality: Teachers'

Handbook of Critical Media Literacy challenges the practice of teaching the classics and the canon of acceptable literary works far removed from students' experiences, with emphasis on learning environment over the presentation of any specific or specified content. The authors, Ladislaus Semali and Ann Watts Pailliotet, present literacy education as 'intermedial' in nature; it entails constructing connections among varying conceptions and sign systems. Reading printed texts requires more than simply decoding letters into words or sounds; it involves finding meaning, motive, structure, and affect. The same goes for reading the electronic text. The authors argue for the discourse of literacy to take up a critical stance by examining a whole wide array of texts that form the meaning-making process of the looming information age. Intermediality examines, extends, and synthesizes the existing literary definitions, texts, theories, processes, research and contexts. It brings into focus the possibilities of working with media texts to address questions adapted from linguists and literary educators. Thus, in this book, critical media literacy becomes a competency to read, interpret, and understand how meaning is made and derived from print, photographs and other electronic and graphic visuals.

Community-Based Global Learning

The Theory and Practice of Ethical Engagement at Home and Abroad *Stylus Publishing, LLC*

International education, service-learning, and community-based global learning programs are robust with potential. They can positively impact communities, grow civil society networks, and

have transformative effects for students who become more globally aware and more engaged in global civil society – at home and abroad. Yet such programs are also packed with peril. Clear evidence indicates that poor forms of such programming have negative impacts on vulnerable persons, including medical patients and children, while cementing stereotypes and reinforcing patterns of privilege and exclusion. These dangers can be mitigated, however, through collaborative planning, design, and evaluation that advances mutually beneficial community partnerships, critically reflective practice, thoughtful facilitation, and creative use of resources. Drawing on research and insights from several academic disciplines and community partner perspectives, along with the authors' decades of applied, community-based development and education experience, they present a model of community-based global learning that clearly espouses an equitable balance between learning methodology and a community development philosophy. Emphasizing the key drivers of community-driven learning and service, cultural humility and exchange, seeking global citizenship, continuous and diverse forms of critically reflective practice, and ongoing attention to power and privilege, this book constitutes a guide to course or program design that takes into account the unpredictable and dynamic character of domestic and international community-based global learning experiences, the varying characteristics of destination communities, and a framework through which to integrate any discipline or collaborative project. Readers will appreciate the numerous toolboxes and reflective exercises to help them think through the creation of independent programming or courses that support

targeted learning and community-driven development. The book ultimately moves beyond course and program design to explore how to integrate these objectives and values in the wider curriculum and throughout formal and informal community-based learning partnerships.

African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors *IGI Global*

The lack of African Americans in leadership roles within the academy creates a real crisis in the leadership pipeline. Further guidance and understanding of steps to advancement from established African American leaders in the academy is therefore needed. *African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors* provides an exhaustive exploration of leadership and mentorship through purpose, preparation, and preceptors. This edited book explains how to identify ways that individuals can strengthen their career trajectory, determine strategies to employ for career advancement, establish lasting and impactful connections with key stakeholders per career aspirations, provide guidance for individuals seeking advancement within the academy, and explore current theoretical and practical nuances with regard to research, literature, and application of leadership and mentorship of African Americans in the academy. Covering topics such as cross-racial mentorship, emotionally intelligent leadership, and African American leaders, this text is ideal for teachers, faculty, university administrators, leaders in education, aspiring future leaders, researchers, academicians, and students.

Assessing for Learning**Building a Sustainable Commitment Across the Institution** *Stylus Publishing, LLC.*

While there is consensus that institutions need to represent their educational effectiveness through documentation of student learning, the higher education community is divided between those who support national standardized tests to compare institutions' educational effectiveness, and those who believe that valid assessment of student achievement is based on assessing the work that students produce along and at the end of their educational journeys. This book espouses the latter philosophy—what Peggy Maki sees as an integrated and authentic approach to providing evidence of student learning based on the work that students produce along the chronology of their learning. She believes that assessment needs to be humanized, as opposed to standardized, to take into account the demographics of institutions, as students do not all start at the same place in their learning. Students also need the tools to

assess their own progress. In addition to updating and expanding the contents of her first edition to reflect changes in assessment practices and developments over the last seven years, such as the development of technology-enabled assessment methods and the national need for institutions to demonstrate that they are using results to improve student learning, Maki focuses on ways to deepen program and institution-level assessment within the context of collective inquiry about student learning. Recognizing that assessment is not initially a linear start-up process or even necessarily sequential, and recognizing that institutions develop processes appropriate for their mission and culture, this book does not take a prescriptive or formulaic approach to building this commitment. What it does present is a framework, with examples of processes and strategies, to assist faculty, staff, administrators, and campus leaders to develop a sustainable and shared core institutional process that deepens inquiry into what and how students learn to identify and improve patterns of weakness that inhibit learning. This book is designed to assist colleges and universities build a sustainable commitment to assessing student learning at both the institution and program levels. It provides the tools for collective inquiry among faculty, staff, administrators and students to develop evidence of students' abilities to integrate, apply and transfer learning, as well as to construct their own meaning. Each chapter also concludes with (1) an Additional Resources section that includes references to meta-sites with further resources, so users can pursue particular issues in greater depth and detail and (2) worksheets, guides, and exercises designed to build collaborative ownership of assessment. The second edition now covers: *

Strategies to connect students to an institution's or a program's assessment commitment * Description of the components of a comprehensive institutional commitment that engages the institution, educators, and students--all as learners * Expanded coverage of direct and indirect assessment methods, including technology-enabled methods that engage students in the process * New case studies and campus examples covering undergraduate, graduate education, and the co-curriculum * New chapter with case studies that presents a framework for a backward designed problem-based assessment process, anchored in answering open-ended research or study questions that lead to improving pedagogy and educational practices * Integration of developments across professional, scholarly, and accrediting bodies, and disciplinary organizations * Descriptions and illustrations of assessment management systems * Additional examples, exercises, guides and worksheets that align with new content

Handbook of Reflection and Reflective Inquiry

Mapping a Way of Knowing for Professional Reflective Inquiry *Springer Science & Business Media*

Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry - and why it's necessary in our lives - can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar

events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention (Thoreau's "wide-awakeness"), an act of consciousness, and a process by which people can understand themselves, their work (particularly in the form of life projects), and others. Building on this foundation, the Handbook analyzes through the work of 40 internationally oriented authors: - Definitional issues concerning reflection, what it is and is not; - Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education; - Reflection as promoted across professional educational domains, including K-12 education, teacher education, occupational therapy, and the law; - Methods of facilitating and scaffolding reflective engagement; - Current pedagogical and research practices in reflection; - Approaches to assessing reflective inquiry. Educators across the professions as well as adult educators, counselors and psychologists, and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.

Presenting the realities of thirty diverse and award-winning programs, contributors to the volume describe reporting lines, funding sources, jurisdictions, curricula, and other critical programmatic matters and provide insight into their program histories, politics, and philosophies. An online web companion to the book includes access to the primary documents that have been of major importance to the development or sustainability of the program, described in a "Primary Document" section of each chapter. Handbook of Research on Applying Universal Design for

Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation

Concepts, Case Studies, and Practical Implementation *IGI Global*

Universal design for learning (UDL) has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments. In recent years, UDL has gone beyond the field of disability and been explored with regards to international and indigenous students. There is now a sizable body of literature that details the benefits of implementing UDL in higher education, as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions. There is, however, still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms. Therefore, there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like. The Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats, as well as across the undergraduate and graduate sectors. The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments. While highlighting UDL in areas such as educational technology, student engagement, assignment design, and inclusive education, this book is ideally

intended for inservice and preservice teachers, administrators, teacher educators, higher education professors and leaders, practitioners, researchers, academicians, and students interested in the integration of UDL into strategic academic plans.

Research on Enhancing the Interactivity of Online Learning *IAP*

Our goal with this book, *Research on Enhancing the Interactivity of Online Learning*, is to present a juried, scholarly, and accessible review of research, theory, and/or policy on specific issues of interactive online learning for K-16 educators, administrators, and students of online learning. Online learning has become the norm rather than the exception for many of today's students. Instructors are more willing to explore online learning options, students are enrolling in record numbers and colleges, as well as many K-12 institutions, are offering more online courses. As educators, we have more tools than ever to ensure online course success, but just as with a traditional class, we must continue to place emphasis on good pedagogy. To achieve good pedagogy, online teaching takes additional time and a restructuring of course content by the instructor. Student issues include coping strategies, ease of navigation, skills required to complete the course, availability of online resources, feedback from the instructor, and collaborative, interactive learning opportunities. Principles of interactive online learning are new to many, and this book provides a forum for interactive online learning research while also including ideas that enhance both the practical and theoretical aspects of interactive online learning. The editors have included chapters that can further

knowledge and understanding of emerging trends and foster debate regarding issues that surround interactive online learning.

Reflecting on Service-Learning in Higher Education

Contemporary Issues and Perspectives *Lexington Books*

Reflecting on Service-Learning in Higher Education: Contemporary Issues and Perspectives examines forms of pedagogy such as service-learning, experiential learning, and problem-based learning in order to determine how students make connections between and among abstract academic concepts and real-life issues. This edited collection is divided into three sections—"Reflecting on Community Partnerships," "Reflecting on Classroom Practice," and "Reflecting on Diversity"—so as to represent interdisciplinary subjects, diverse student populations, and differing instructional perspectives about service-learning in higher education. Contributors provide service-learning programs and plans that can be replicated or adapted at other institutions of higher education. This book is recommended for scholars and practitioners of education.

Resources in Education

Boundaries of Adult Learning *Routledge*

Until relatively recently, adult learning in the UK was largely recognised as being situated mainly within the LEA adult education centre, university extra-mural departments and the WEA. However, this picture has changed. The major change has been a shift from 'education' to 'learning' as the key organising concept. A greater range of settings are now recognised as sites producing learning, and alongside this has grown a debate about the purpose and form of study within adult learning. This has led people to question both the concept of adult learning and the boundaries of its provision. This book reviews and assesses the changes which are taking place. It explores the disputes surrounding adult learning, discussing how boundaries have blurred thereby creating new opportunities such as APL and credit transfer, and including a significantly wider range of activities within the definition of learning. It also assesses the extent to which, despite the changes in boundaries, inequalities in learning opportunities still persist.

Spirituality in Systemic Family Therapy Supervision and Training *Springer Nature*

This book examines the implications of exploring spirituality through the lens of human relationships. It addresses systemic supervision and training and explores a systemic approach to the development of the self. The book provides an educational methodology that lays a foundation in describing an operational model of spirituality that is applicable for both theistic and nontheistic perspectives. In addition, it details how spirituality is itself a diversity as well as explores spirituality through a lens of diversity. In addition, a pilot research project on spirituality set in

a Marriage and Family (MFT) Live Supervision Group illustrates how to apply a systemic approach to spirituality. Finally, the book offers examples of practice using spirituality in various training settings. Key areas of coverage include: How a systemic approach to spirituality enables the lens of relationship and diversity to enrich supervising and teaching family therapy emerging from the self of therapist concerns. Theoretical perspectives that connect systemic practice with spirituality in an approach for family therapy. How a systemic spiritual approach can be used in training marriage and family therapists. Interventions that focus on how a relational systemic approach views transcendence and immanence from both clinical and spiritual perspectives. Concepts that inform supervision and training with the goals of educating students to be spiritually literate and spiritually sensitive. Barriers to implementing this approach with examples of how to address such obstacles. Spirituality in Systemic Family Therapy Supervision and Training is a must - have resource for researchers, professors, graduate students as well as clinicians, supervisors, and professionals in clinical psychology, family studies / family therapy, and public health as well as all interrelated disciplines.

Preparing STEM Teachers

The UTeach Replication Model *IAP*

STEM project-based instruction is a pedagogical approach that is gaining popularity across the USA. However, there are very few teacher education programs that focus specifically on preparing graduates to teach in project-based environments. This book is focused on the UTeach program, a STEM teacher education model that is being implemented across the USA in 46 universities. Originally focused only on mathematics and science,

many UTeach programs are now offering engineering and computer science licensure programs as well. This book provides a forum to disseminate how different institutions have implemented the UTeach model in their local context. Topics discussed will include sustainability features of the model, and how program assessment, innovative instructional programming, classroom research and effectiveness research have contributed to its success. The objectives of the book are: • To help educators gain insight into a teacher education organizational model focused on STEM and how and why it was developed • To present the theoretical underpinnings of a STEM education model, i.e. deep learning, conceptual understanding • To present innovative instructional programming in teacher education, i.e. projectbased instruction, functions and modeling, research methods • To present research and practice in classroom and field implementation and future research recommendations • To disseminate program assessments and improvement efforts
