Dictionary Of Psychological Testing Assessment And ...

Tests and assessments are two separate but related components of a psychological evaluation. Psychologists use both types of tools to help them arrive at a diagnosis and a treatment plan. Testing involves the use of formal tests such as questionnaires or checklists. These are often described as “norm-referenced” tests.

Understanding psychological testing and assessment

Psychological testing - Psychological testing - Test norms: Test norms consist of data that make it possible to determine the relative standing of an individual who has taken a test. By itself, a subject’s raw score (e.g., the number of answers that agree with the scoring key) has little meaning.

Psychological testing - Test norms | Britannica

The Myers-Briggs Type Indicator (MBTI) is an introspective self-report questionnaire indicating differing psychological preferences in how people perceive the world and make decisions. The test attempts to assign four categories: introversion or extraversion, sensing or intuition, thinking or feeling, judging or perceiving.
