Chapter 7 Artificial Neural Networks - Business ...

The use of Artificial Neural Networks (ANNs) for modeling and performance prediction is becoming increasingly popular in the last two decades. This is mainly due to the fact that ANNs have very good approximation capabilities and offer additional advantages such as short development and fast processing time. Artificial neural networks are one of the most powerful computer

CHAPTER 7 ARTIFICIAL NEURAL NETWORK MODELING

These networks are inspired by the neurons in the brain but do not actually simulate neurons. Artificial neural networks typically contain many fewer than the approximately 10 11 neurons that are in the human brain, and the artificial neurons, called units, are much simpler than their biological counterparts. Neural networks have had considerable success in low-level reasoning for which there is abundant training data such as for image interpretation, speech recognition and machine translation.
