Abstract. This paper provides an overview of previous work that has explored issues of social, organizational and corporate identity. Differences in the form and focus of research into these three topics are noted. Social identity work generally examines issues of cognitive process and structure; organizational identity research tends to address the patterning of shared meanings; studies of corporate identity tend to focus on products that communicate a specific image.

An analysis of the social identity processes involved in organizational mergers suggests that organizational identification after a merger is contingent on a sense of continuity of identity. This sense of continuity, in turn, is argued to be contingent on the extent to which the individual's own pre-merger organization dominates, or is dominated by, the merger partner.

Identity (social science) - Wikipedia

Introduction. Social Identity Theory (SIT) is an elaborate and well-tested social-psychological theory on intergroup and social relations. As such, it therefore focuses on the role of groups rather than the individual and makes a compelling case that social situations and group life have a more profound impact on individuals than is generally assumed in the psychological literature.
