we can forget that the results are statistical at all, and treat them as exact laws of physics. For instance, the familiar equation of state of an ideal gas, PV=νRT(see Section 6.2), is actually a statistical result. In other words, it relates the average pressure, and the average volume, to the average temperature.

Statistical mechanics is the bridge between the microscopic and macroscopic worlds. Thermodynamics and statistical mechanics assume that the macroscopic properties of the system do not change with time on the average. Thermodynamics describes the change of a macroscopic system from one equilibrium state to another.
