Bs 8888 Standard Drawing

BS 8888:2020 is typically used in the aerospace, defence, automotive, rail, nuclear and medical devices sectors, and also by any engineering or manufacturing organization that needs to produce an engineering drawing. Why should you use BS 8888:2020? This is a unique national framework standard for the technical specification of products and their component parts using engineering drawings, manually produced (2D) or created using CAD systems and 3D modelling.

BS 8888 Technical product documentation and specification

The standard explains the way in which engineering drawings outline and present these specifications, and covers all of the symbology and information that engineers and designers need to include on their drawings, whether they are produced in 2D or in 3D, created using CAD systems and 3D modelling. Acting as a navigational roadmap to the ISO standards, BS 8888 provides information engineers need on a regular basis, including the nuts and bolts of engineering specification.
