Serverless Architectures With Aws Lambda

A serverless architecture is a way to build and run applications and services without having to manage infrastructure. Your application still runs on servers, but all the server management is done by AWS. You no longer have to provision, scale, and maintain servers to run your applications, databases, and storage systems.

Serverless Architectures - Amazon Web Services (AWS)

TAGS: amazon api gateway, amazon lambda, AWS Cloud, serverless, serverless architectures Andrew Baird
Prior to becoming a Solutions Architect, Andrew was a developer, including time as an SDE with Amazon.com.

Serverless Architectures with AWS

Lambda: Overview and ...

For the logic layer of a serverless application, you can execute your business logic using AWS Lambda. Developers and organizations are finding that AWS Lambda is enabling much faster development speed and experimentation than is possible when deploying applications in a traditional server-based environment.

Serverless Architectures with AWS Lambda

AWS Lambda is the serverless solution provided by Amazon and is the most widely used serverless technology in the world. Here, a developer can provide a piece of code from a language he desires and create a 'Lambda Function'. That lambda function can be invoked using a

set of triggers we define ourselves.
