Psychology In Modules (Spiral)
Macmillan

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human

impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and

key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose. W. Norton & Company

The seminar leader is the conduit of

basic psychotherapeutic knowledge. The Learning Psychotherapy Seminar Leader's Manual helps instructors introduce beginners to the concepts and processes that define psychotherapy. With the help of the main text and the Learning Psychotherapy Vignettes videotape, seminar leaders show trainees not only the diversity of useful ideas from psychotherapeutic schools but also those variations that fit their own personalities. The program is well-structured but flexible as seminar leaders are encouraged to adapt them to individual training situations-bring in your own cases and encourage trainees to regularly bring in their current clinical problems. Make psychotherapeutic learning come alive by using the modules as the jumping off point!
