Criminal Justice Research in an Era of Mass Mobility *Routledge*

We live in an era of mass mobility where governments remain committed to closing borders, engaging with securitisation discourses and restrictive immigration policies, which in turn nurture xenophobia and racism. It is within this wider context of social and political unrest that the contributors of this collection reflect on their experiences of conducting criminological research. This collection focuses on the challenges of doing research on the intersections between criminal justice and

immigration control, choosing and changing methodologies while juggling the disciplinary and interdisciplinary requirements of the work's audience. From research design, to fieldwork to writing-up, this book captures every part of the research process, drawing on a range of topics such as migration control, immigrant detention and border policing. It also reflects on more neglected areas such as the interpersonal and institutional contexts of research and the ontological and epistemological assumptions embedded within data analysis methods. It makes a significant contribution to our understanding of the major developments in current research in this field, how and why they occur and with what consequences. This book seeks to shake off the phantom of undisturbed research settings by bringing to the fore the researchers' involvement in the research process and its products. An interdisciplinary collection, it can be used as a reference not just for those interested in the criminology of mobility but also as a learning tool for anyone conducting research on a highly charged topic in contemporary policy and politics.

The proliferation of information systems throughout the criminal justice system has prompted many universities supporting criminal justice programs to add criminal justice information systems technology to their curriculums. Several universities have gone so far as to hire professors with specializations in information technology and to offer criminal justice information systems as an area of concentration. *Introduction to Criminal Justice Information Systems* gives an overview of the various software systems and technologies currently used in the criminal justice environment. The book covers a variety of topics critical to each member of the criminal justice system: police, prosecutor, courts, and corrections. It details the current systems in use, how they are used, and how separate systems interact with others. It also suggests how the current technology and the processes built upon it will evolve. While designed as a textbook to meet the needs of an introductory criminal justice information technology course, *Introduction to Criminal Justice Information Systems* is also a flexible resource useful to professionals in relevant areas of the criminal justice system. With rapidly increasing development and use of technology in modern law enforcement, this book provides a much-needed reference for those who are responsible for its implementation as well as an essential introduction to those who will become responsible for it. An instructor's manual is available as an electronic download upon request.
