Infection prevention in IV therapy - Smith & Nephew

Abstract. The aim of this article is to review the principles of infection control relating to intravenous (IV) therapy. IV therapy and peripheral IV cannulation are common procedures. Zingg and Pittet (2009) noted that as many as 80% of hospitalized patients will have a cannula in situ, and Hart (2008) suggested that patients who require IV therapy are often seriously ill and immunocompromised, thus are more susceptible to infection.
