The Story of the Jewish People

Letters to Auntie Fori *Rosetta Books*

A history of Judaism written in letters from historian Martin Gilbert to his acquaintance in India, who wants to learn more about her ancestry. At her ninetieth birthday celebration in New Delhi, "Auntie Fori" revealed to her longtime acquaintance, Sir Martin Gilbert, that she was not of Indian birth but actually Hungarian—and Jewish. She did not know what this Jewish identity involved, historically or spiritually, and asked him to enlighten her. In response, Sir Martin embarked on the series of letters that have been gathered to form this book, shaping each one as a concise, individually formed story. He presents Jewish history as the narrative expression—the timeline—of the Jewish faith, and the faith as it is informed by the history. In Sir Martin's hands, these stories are rich in incident and achievement, starting with Adam and Eve through the Biblical and post-Biblical periods, to the long history of the Jews in the Diaspora, and ending with an unexpected visit to an outpost of Jewry in Anchorage, Alaska. Ranging through almost every country in the world—including China and India—he maintains a chronological structure, weaving in the history of other peoples and faiths, to give Auntie Fori, and us, a sense of the larger stage on which Jewish history has played out. "Compact, breezy, and thoroughly enjoyable . . . For those, like Auntie Fori, hoping to understand the Jewish past and present, this book is a treasure." —Booklist

Play Bigger

How Rebels and Innovators Create New Categories and Dominate Markets *Hachette UK*

In today's world, it's no longer enough to create great new products; rather companies now must create whole new categories that destroy old ones. Uber created a new personal transportation category and destroyed taxis and limos. Salesforce.com created a new category of cloud-base sales automation, dethroning the old CRM industry. Airbnb, Workday, Tesla and Netflix are all winning by creating entirely new business categories that destabilise old ones. The category is the new strategy. The conclusion: If you want to build a legendary company, you need to design and build a legendary category at the same time, and dominate it over time. Your company needs to be a Category King. And if you don't design a Category King, you're creating a failure. Drawing on examples from within and beyond our own practice, PLAY BIGGER shows both entrepreneurs and established enterprises how to define, develop and rule a category over time.

Dialogues in Music Therapy and Music Neuroscience: Collaborative Understanding Driving Clinical Advances

Frontiers Media SA

Music is a complex, dynamic stimulus with an un-paralleled ability to stimulate a global network of neural activity involved in attention, emotion, memory, communication, motor co-ordination and cognition. As such, it provides neuroscience with a highly effective tool to develop our understanding of brain function, connectivity and plasticity. Increasingly sophisticated neuroimaging technologies have enabled the expanding field of music neuroscience to reveal how musical experience, perception and cognition may support neuroplasticity, with important implications for the rehabilitation and assessment of those with acquired brain injuries and neurodegenerative conditions. Other studies have indicated the potential for music to support arousal, attention and emotional regulation, suggesting therapeutic applications for conditions including ADHD, PTSD, autism, learning disorders and mood disorders. In common with neuroscience, the music therapy profession has advanced significantly in the past 20 years. Various interventions designed to address functional deficits and health care needs have been developed, alongside standardised behavioural assessments. Historically, music therapy has drawn its evidence base from a number of contrasting theoretical frameworks. Clinicians are now turning to neuroscience, which offers a unifying knowledge base and frame of reference to understand and measure therapeutic interventions from a biomedical perspective. Conversely, neuroscience is becoming more enriched by learning about the neural effects of 'real world' clinical applications in music therapy. While neuroscientific imaging methods may provide biomarking evidence for the efficacy of music therapy interventions it also offers important tools to describe time-locked interactive therapy processes and feeds into the emerging field of

social neuroscience. Music therapy is bound to the process of creating and experiencing music together in improvisation, listening and reflection. Thus the situated cognition and experience of music developing over time and in differing contexts is of interest in time series data. We encouraged researchers to submit papers illustrating the mutual benefits of dialogue between music therapy and other disciplines important to this field, particularly neuroscience, neurophysiology, and neuropsychology. The current eBook consists of the peer reviewed responses to our call for papers.

The Calculus of Friendship

What a Teacher and a Student Learned about Life while Corresponding about Math *Princeton University Press*

The Calculus of Friendship is the story of an extraordinary connection between a teacher and a student, as chronicled through more than thirty years of letters between them. What makes their relationship unique is that it is based almost entirely on a shared love of calculus. For them, calculus is more than a branch of mathematics; it is a game they love playing together, a constant when all else is in flux. The teacher goes from the prime of his career to retirement, competes in whitewater kayaking at the international level, and loses a son. The student matures from high school math whiz to Ivy League professor, suffers the sudden death of a parent, and blunders into a marriage destined to fail. Yet through it all they take refuge in the haven of calculus- until a day comes when calculus is no longer enough. Like calculus itself, The Calculus of Friendship is an exploration of change. It's about the transformation that takes place in a student's heart, as he and his teacher reverse roles, as they age, as they are buffeted by life itself. Written by a renowned teacher and communicator of mathematics, The Calculus of Friendship is warm, intimate, and deeply moving. The most inspiring ideas of calculus, differential equations, and chaos theory are explained through metaphors, images, and anecdotes in a way that all readers will find beautiful, and even poignant. Math enthusiasts, from high school students to professionals, will delight in the offbeat problems and lucid explanations in the letters. For anyone whose life has been changed by a mentor, The Calculus of Friendship will be an unforgettable journey.
