Epilepsy at the molecular level -- ScienceDaily

Abstract. Epileptic seizures occur as a result of episodic abnormal synchronous discharges in cerebral neuronal networks. Although a variety of non-conventional mechanisms may play a role in epileptic synchronization, cascading excitation within networks of synaptically connected excitatory glutamatergic neurons is a classical mechanism.

AMPA receptors as a molecular target in epilepsy therapy ...

The pathophysiology of epilepsy and seizures is diverse, accounting for the many different types of seizure disorders. However, one commonality across epilepsies is a disrupted balance between excitatory (via glutamatergic signaling) and inhibitory (via GABAergic signaling) drive at the synaptic level that can result in seizure activity.

Epilepsy is a serious hazard to human health. Minimally invasive surgery is currently an extremely effective treatment to refractory epilepsy. However, it is challenging to localize the lesion for most patients because they are MRI negative. The identification of epileptic foci in local brain region will be helpful to the localization of epileptic foci because we can infer whether there is a ...

Frontiers | Identifying Epilepsy Based on Deep Learning ...

Mammalian/mechanistic target of rapamycin (mTOR) is a serine-threonine kinase that controls several important aspects of mammalian cell function. mTOR activity is modulated by various intra- and extracellular factors; in turn, mTOR changes rates of translation, transcription, protein degradation, cell signaling, metabolism, and cytoskeleton dynamics. mTOR has been repeatedly shown to participate in neuronal development and the proper functioning of mature neurons.

Molecular neurobiology of mTOR - PubMed

Epilepsy is a heterogeneous disorder with diverse syndromes and etiologies that include structural abnormalities (i.e. stroke, tumors, malformations of cortical development, etc.), functional abnormalities (involving ion channels, as in autosomal dominant frontal lobe epilepsy due to an acetylcholine channelopathy) or a combination of both (familial temporal lobe epilepsy with audiogenic seizures).
