Britain has two native frogs, two toads, and three species of newts. Of these, the common frog and common toad are likely to be found in gardens throughout Britain The common or smooth newt and the palmate newt are also widely distributed

Amphibians in your garden / RHS Gardening

Amphibians like to hibernate in a cool (but not cold), dark and damp shelter, safely away from predators. Some frogs use the mud at the bottom of ponds, but many amphibians spend the winter on land. They do like to get a little way underground if they can, so give them a helping hand by creating their very own mansion, full of cavities galore.
