These laws involve inertia, mass, velocity, and momentum. Key forces include gravity, friction, and magnetism. A force is required to do work, and generating a force requires energy. Energy can be stored as potential energy, or it can have kinetic energy—the energy of motion. Energy can also be converted and exchanged through energy transfer.

Kinematic Equations: Sample Problems and Solutions

Motion energy is the sum of potential and kinetic energy in an object that is used to do work. Work is when a force acts on an object and causes it to move, change shape, displace, or do something physical. Potential energy is energy that is stored in an object or substance. Kinetic energy is the energy of a moving object.
