GeoServer is a software server written in Java, and as such it requires Java to be present in our environment. The process to install Java will differ according to our target server's architecture. However, in all cases, the first decision we must make is what version of Java to install and with which package.

Mastering GeoServer did a very good job of covering install and setup, with screenshots to help along the way. Also good coverage of working with various data types, as well as some of the more complex features of GeoServer. Recommended for anyone wishing to implement or learn more about GeoServer.
