Service & Support - Boonton | FAQ

There was a construction article for an RF millivoltmeter some time ago that sounds similar. It used a chopper to create a "dummy" signal that matched the signal being measured. This tracked out many of the non-linearities in the detector diode and allowed the circuit to work from less than 70 mV up to 3 volts. From the chart, it looked as if it'd measure down to less than 10 mV and for a ...
