This chapter overviews the additives that are called “processing aids,” because many additives can improve the processing of polyolefins (POs) though this may not be their primary purpose. Processing aids for closed-mold processes are sometimes the key additives that make a molded product both possible and profitable.

Recycled polyolefins are also commonly competing with an abundant supply of virgin resins, rendering recycled grades expensive and impractical. Additives, such as UV stabilizers and antioxidants for polyolefins, can be incorporated in recycled formulations to improve their quality. Accordingly, recycling and reusing polyolefins with high-performance additives is a viable method to minimize waste and continue development toward a circular economy supported by innovative and useful products.
