Surface area of a triangular prism - Tutorialspoint

To find the surface area of a triangular prism, use the formula Surface Area = $L + 2B$, where L is the lateral area and B is the area of the base. Find the lateral area by calculating the perimeter of the base and multiply it by the height of the prism. Then, find the base area by multiplying the base by the height of the triangle and dividing by 2.

How to Find Surface Area of a Triangular Prism: 12 Steps

A triangular prism has five faces - there are two congruent triangles (the two ends) and three rectangles. Its cross-section is a triangle. The surface area of a triangular prism is the sum of the area of these five faces. So surface area = (2 x area of congruent triangles) + (area of bottom face) + (area of left face) + (area of side face).
