Rubber Pad Forming Processes Technology

Rubber pad forming is a metalworking process where sheet metal is pressed between a die and a rubber block, made of polyurethane. Under pressure, the rubber and sheet metal are driven into the die and conform to its shape, forming the part. The rubber pads can have a general purpose shape, like a membrane. Alternatively, they can be machined in the shape of die or punch. Rubber pad forming is a deep drawing technique that is ideally suited for the production of small and medium-sized series. Dee
