In short, the brain is beautiful. It is remarkably well adapted to its purpose, unflinchingly devoted to its duty, and it is insanely underappreciated for the work it does. It never sleeps, it never stops. It creates you, and it can destroy you.

### The Brain: A Very Short Introduction Very Short ...

"Memories must somehow be represented physically in the brain. Brain chemistry and structure is altered by experience and the stability of these physicochemical changes presumably corresponds to the retention duration of memory." — Michael O'Shea, The Brain: A Very Short Introduction

### The Brain Quotes by Michael O'Shea

'The human brain' considers the brain as a vast network of connections from which come our extraordinary abilities: perception, learning, memory, reasoning, language, and — somehow or another — consciousness. Different areas deal with vision, hearing, speech, body image, motor control, and forward planning. They are all linked, but this is not done through one central processor, but by ...
