Improving Your Test Questions -

citl.illinois.edu

An objective question usually has only one potential correct answer (although there may be some room for answers that are close), and they leave no room for opinion. Objective test questions differ from subjective test questions, which have more than one potential correct answer and sometimes have room for a

justified opinion.

Objective test questions may be constructed as a list of possible answers, requiring the students to recognize the correct one from the list.
