By realizing the promise of digital and computational pathology with the use of intelligent software and machine learning, some labs will be in position to pursue limitless possibilities for their business, customers, and patients. Other labs won't survive. Laboratories that hesitate to embrace the era of data-driven medicine will be left behind.

Redefining Pathology with AI | Proscia

Digital pathology stands for using technology in order to speed up and enhance workflow in a pathology laboratory. In practice, it means using advanced digital scanners to capture digital slides, then store them, analyze and share with others. The entire digital pathology system or environment is comprised of four key components:

The future is now: Digital pathology | WizardHealth

Digital pathology is a sub-field of pathology that focuses on data management based on information generated from digitized specimen slides. Through the use of computer-based technology, digital pathology utilizes virtual microscopy. Glass slides are converted into digital slides that can be viewed, managed, shared and analyzed on a computer monitor.

Digital pathology - Wikipedia

Founded in 2014 by technologists from Johns Hopkins, Proscia is a data solutions provider for digital pathology. The company's vision is to bring computer intelligence to pathology -- to illuminate the world's pathology information, unlocking insights for faster, more precise medicine.

Top digital pathology companies | VentureRadar

Digital pathology is, by now, indisputably the future of the field. Although some are still reluctant to accept its place in the lab – and despite its slow adoption in many institutions – the digital slide image is slowly replacing the glass slide on the microscope's stage.
