In a good design, all these aspects have to be considered in a balanced way. Due to the special features of hollow sections and their connections it is even here of more importance than for steel structures of open sections. The designer should therefore be aware of the various aspects of hollow sections, as basically described in this book.

CIDECT

With respect to the design of steel structures and especially as far as steel structures made with hollow sections are concerned, complementary material to available books such as the CIDECT book for students (“Hollow Sections in Structural Applications” by J. Wardenier) should be made available.
