CCSDS REPORT CONCERNING NAVIGATION DATA—DEFINITIONS AND ...

A navigational database is a type of database in which records or objects are found primarily by following references from other objects. The term was popularized by the title of Charles Bachman's 1973 Turing Award paper, The Programmer as Navigator. This paper emphasized the fact that the new disk-based database systems allowed the programmer to choose arbitrary navigational routes following relationships from record to record, contrasting this with the constraints of earlier magnetic-tape and

Navigational database - Wikipedia

Data integration is often also solved as a problem of data, rather than metadata, with the use of so-called master data. ISO/IEC 11179 claims that it is a standard for metadata-driven exchange of data in an heterogeneous environment, based on exact definitions of data.

ISO/IEC 11179 - Wikipedia

A naming convention can include capitalizing an entire word to denote a constant or static variable (which is commonly done in Flash programming), or it could be a simple character limit in a coding language (such as SQL). Naming conventions have functional as well as organizational qualities.
