The lesson here is that the connection between movement and pain is complex. There's no doubt that exercise can reduce pain, improve function and help to prevent injury. But we should be very skeptical about claims concerning the assessment and correction of "dysfunctions" and their relevance for pain in everyday movements (Tuminello 2017). 5.

Trauth said that he supports a movement toward better posters, "in principle." In his graduate course on science communication, for example, he asks students to review 10 posters and guess which won awards. There is a typically little consensus. In reality, all have won some kind of award and none, in Trauth's estimation, is really great.
