Vdo Tpms Application Guide

A tire pressure monitoring system (TPMS) uses sensors in your tires to tell if one or more of your tires are under-inflated. A low tire pressure light or TPMS light on your dash indicates that your air pressure is more than 25% below the manufacturer's recommended inflation. Continuing to drive with tire pressure that low is very dangerous - it can result in erratic handling, reduced braking capability, and even a vehicle rollover during sudden changes in direction.

Vdo Tpms Application Guide - lundbeck.peaceboy. de

The TPMS Pro is quick, intelligent, but extremely user-friendly. In addition to activating and programming TPMS sensors, newly programmed sensors can be loaded onto the vehicle's ECU via the OBD2 cable to begin the relearning process and read and delete any errors. It has a high-res 4.3" screen with a rubber case, icon navigation and step-by-step guides to operate the tool easily

and efficiently.
