Great Logistics Sites: Supply Chain

...

Logistics, or logistical planning, refers to the process that a business uses in order to coordinate its supply chain. Supply Chain is the entire system of producing and delivering a product or service, from the very beginning stage of sourcing the raw materials to the final operations. It includes a wide variety of tasks and activities, such as managing how raw materials or inputs are acquired and transported to the business, how inventory and inputs are stored at the business ...
