Ideal billing rate = (Salary / hourly costs + overhead costs + desired profit margin) ÷ total working hours ÷ utilization rate For the designer, this is $89,010 \div 2,080 \div .85 = \50.34 . As long as the agency is billing clients a little over \$50/hour for their designer's time, they can comfortably schedule them at an 85% utilization rate while keeping their 25% desired profit margin.

What is Resource Utilization and How Can You Calculate It?

The success and failure of a business entity depend highly on how it performs in the market, which is based on three important factors, i.e. productivity, utilization and efficiency. One of the primary objective of all the organizations worldwide is to improve the productivity and efficiency. So, many misconstrue these two terms which are different in the sense that productivity is the ratio of outputs produced to inputs involved in the process of production.
