**Integrated Costschedule Risk Analysis**

Several issues must be addressed in developing an integrated cost / schedule risk analysis on a real schedule: The schedule is usually developed to a lower level of detail than the cost estimate. In our schedule, while the schedule includes tasks of Design 1, Build 1 and Test 1, the cost estimate may be developed and actual costs collected at the Component 1 summary level.

A major flaw in traditional methods of cost risk analysis is that it does not adequately account for variances in time dependent costs. Time dependent costs are associated with resources with unit rates (hourly/daily) that can expand or contract if more or less time is required to complete project activities and can be a major source of cost risk in many projects.
