Introduction To Probabilistic Graphical Models

Probabilistic graphical model (PGM) provides a graphical representation to understand the complex relationship between a set of random variables (RVs). RVs represent the nodes and the statistical dependency between them is called an edge. An example of how a probabilistic graphical model looks like is shown above.

Probabilistic Graphical Model - Ioannis Kourouklides

A Bayesian network (also known as a Bayes network, belief network, or decision network) is a probabilistic graphical model that represents a set of variables and their conditional dependencies via a directed acyclic graph (DAG). Bayesian networks are ideal for taking an event that occurred and predicting the likelihood that any one of several possible known causes was the contributing factor.
