Visual Studio Solutions Vs Projects

Despite its name, a solution is not an "answer". It's simply a container for one or more related projects, along with build information, Visual Studio window settings, and any miscellaneous files that aren't associated with a particular project. A solution is described by a text file (extension .sln) with its own unique format; it's not intended to be edited by hand. Solution file. Visual Studio uses two file types (.sln and .suo) to store settings for solutions:

Solutions and projects - Visual Studio | Microsoft Docs

Solutions and projects. Despite its name, a solution is not an "answer". A solution is simply a container used by Visual Studio to organize one or more related projects. When you open a solution in Visual Studio, it automatically loads all the projects that the solution contains.
