Challenges for Health and Safety in Higher Education and Research Organisations

Royal Society of Chemistry

This book provides a summary of the main

obstacles for creating and maintaining high standards of health and safety in higher education and research organisations. The obstacles include high staff turnover and an uncertain and constantly evolving research environment, small groups lacking unified management structure, deadline time pressures, restricted funding models and existing "old school" culture. Often the Health and Safety specialists and personnel managers in these organisations find themselves reiterating the same information, which gets lost as soon as the new cohort of workers arrives. Providing insight into methods of managing health and safety, training, and supervision, which help

to build a strong and reliable health and safety system, this book is a collection of "best practices" from experienced safety professionals and researchers in Europe and the United States. These experiences demonstrate how health and safety professionals have overcome these issues and provide readers with ideas and models they can use in their own organisations. The information contained within is aimed at health and safety professionals and managers in universities and research organisations conducting scientific and engineering research with transient workers and students worldwide.

Construction Health and Safety in Developing Countries *Routledge*

The global construction sector is infamous for

high levels of injuries, accidents and fatalities, and poor health and well-being of its workforce. While this record appears in both developed and developing countries, the situation is worse in developing countries, where major spending on infrastructure development is expected. There is an urgent need to improve construction health and safety (H&S) in developing countries. The improvement calls for the development of context-specific solutions underpinned by research into challenges and related solutions. This edited volume advances the current understanding of construction H&S in developing countries by revealing context-

specific issues and challenges that have hitherto not been well explored in the literature, and applying emergent H&S management approaches and practices in developing countries. Coverage includes countries from the regions of sub-Saharan Africa, Latin America, Asia and Europe. This book, which is the first compendium of research into construction H&S issues in developing countries, adds considerable insight into the field and presents innovative solutions to help address poor H&S in construction in developing nations. It is a must read for all construction professionals, researchers and

practitioners interested in construction and occupational H&S, safety management, engineering management and development studies.

Between the Plough and the Pick

Informal, Artisanal and Small-Scale Mining in the Contemporary World

ANU Press

y global social, agrarian and political changes, whilst underlining the roles that local social political-historical contexts play in shaping mineral extractive processes and practices. It shows that the people who are engaged in these mining practices are often the poorest and most exploited labourers-erstwhile

peasants caught in the vortex of global change, who perform the most insecure and dangerous tasks. Although these people are located at the margins of mainstream economic life, they collectively produce enormous amounts of diverse material commodities and find a livelihood (and often a pathway out of oppressive poverty). The contributions to this book bring these people to the forefront of debates on resource politics. The contributors are international scholars and practitioners who explore the complexities in the histories, in labour and production practices, the forces driving such mining, the creative agency and capacities of these miners, as well as the human and environmental costs of ASM. They show how these informal, artisanal and small scale miners are inextricably engaged with, or bound to, global commodity values, are intimately involved in the production of new extractive territories and rural economies, and how their labour reshapes agrarian communities and landscapes of resource access and control. This book drives home the understanding that, collectively, this social and economic milieu redefines our conceptualisation of resource politics, mineral dependent livelihoods, extractive geographies of resources and commodities, and their multiple meanings.

96 Great Interview Questions to Ask Before You Hire

AMACOM

Every manager and human resources department has seen it time and time again--candidates whom they viewed from across the table as promising individuals loaded with potential turning out to be disappointing and underwhelming employees. Meanwhile, numerous resources are wasted yet again while the company continues to seek out the right fits for their needs. Is this just a rite of passage for all businesses, or is there a way to simplify the hiring process and put people in place the first time who can get the job done? The third edition of this practical and wildly popular hiring classic provides

the keys to getting the results you're looking for during the interviewing and hiring process! Employment expert Paul Falcone has packed this resource full with all the interview questions you might possibly need to ask any candidate, so as to best reveal the real person sitting across from you. What is the applicant's motivation for changing jobs? How well does he handle stress? Does she consistently show initiative? The various questions have been tailored to sales, mid-level, or senior management positions. There are questions to gauge likability and fit. There are even pressure-cooker questions that will no doubt reveal eye-opening characteristics

about the candidate that you would not have learned otherwise. Complete with guidelines for analyzing answers, asking follow-up questions, checking references, and making winning offers, *96 Great Interview Questions to Ask Before You Hire* covers the interviewing and hiring process from beginning to end, leaving no stone unturned.

Hazardous Materials Compliance for Public Research Organizations

A Case Study, Second Edition *CRC Press*

Completely revised and updated, *Hazardous Materials Compliance for Public Research Organizations: A Case Study, Second Edition* presents a case study of one university's policies and practices with regard to the procurement, use,

storage and disposal of HAZMAT in the context of a changing internal structure and regulatory environment. The author's presentation is no-holds-barred, using interviews, archival documentation, and unobtrusive observations as a participant where the research institution was at times noncompliant with the new federal guidelines. See *What's New in the Second Edition: Incorporates issues with all types of hazardous materials instead of just focusing on biological HAZMAT* Updated information on current regulations on HAZMAT in relation to universities and research centers Follow-up on the case study university,

disclosing the university's progress in resolving the security and safety shortcomings. By implementing key improvements in safety and security, the universities can also more easily obtain research grant money and satisfy both state and federal safety requirements. This book includes recommendations to improve safety while using and storing biotoxins, chemical, radioactive material, and industrial waste, and to improve overall security at the university. It also highlights improvements that can make the environment a safer and more secure location to perform biological research.
