Fostering the Mathematical Practices in All Students *Heinemann Educational Books*

English Learners, Academic Literacy, and Thinking

Learning in the Challenge Zone *Heinemann Educational Books*

"Deep understanding, critical thinking, subject knowledge, and control of academic literacy are goals we have for all our students. The challenge for teachers is to find a way of teaching that helps everyone, including English learners, to reach these high expectations. In English Learners, Academic Literacy, and Thinking, Pauline Gibbons presents an action-oriented approach that gives English learners high-level support to match our high expectations. Focusing on the middle grades of school, she shows how to plan rigorous, literacy-oriented, content-based instruction and illustrates what a high-challenge, high-support curriculum looks like in practice. Gibbons presents and discusses in detail five broad areas that enable English learners to participate in high-quality learning across the curriculum: engaging deeply with intellectual contexts developing academic literacy employing reading strategies and improving comprehension gaining writing independence and learning content-area genres using classroom talk to make sense of new concepts and as a bridge to writing. Based on these areas she then presents guidelines on designing long-term, high-quality instruction that simultaneously provides explicit scaffolding for English learners. Gibbons makes these guidelines an instructional reality through

dozens of examples of rich activities and tasks that can be used across the curriculum and that support the learning of all students. English Learners, Academic Literacy, and Thinking supports teachers with doable plans for instruction, reflection questions for individual or group study together, and suggestions for further reading."--Publisher.

Better Than Carrots or Sticks

Restorative Practices for Positive Classroom Management *ASCD*

Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In Better Than Carrots or Sticks, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to * Establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills; * Develop a nonconfrontational rapport with even the most challenging students; and * Implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger-pointing and retribution. Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching, and constructive environments built on collective respect and focused on student achievement.

Visible Learning for Literacy, Grades K-12

Implementing the Practices That Work Best to Accelerate Student Learning *Corwin Press*

"Every student deserves a great teacher, not by chance, but by design" — Douglas Fisher, Nancy Frey, & John Hattie What if someone slipped you a piece of paper listing the literacy practices that ensure students demonstrate more than a year's worth of learning for a year spent in school? Would

you keep the paper or throw it away? We think you'd keep it. And that's precisely why acclaimed educators Douglas Fisher, Nancy Frey, and John Hattie wrote *Visible Learning for Literacy*. They know teachers will want to apply Hattie's head-turning synthesis of more than 15 years of research involving millions of students, which he used to identify the instructional routines that have the biggest impact on student learning. These practices are "visible" for teachers and students to see, because their purpose has been made clear, they are implemented at the right moment in a student's learning, and their effect is tangible. Yes, the "aha" moments made visible by design. With their trademark clarity and command of the research, and dozens of classroom scenarios to make it all replicable, these authors apply Hattie's research, and show you: How to use the right approach at the right time, so that you can more intentionally design classroom experiences that hit the surface, deep, and transfer phases of learning, and more expertly see when a student is ready to dive from surface to deep. Which routines are most effective at specific phases of learning, including word sorts, concept mapping, close reading, annotating, discussion, formative assessment, feedback, collaborative learning, reciprocal teaching, and many more. Why the 8 mind frames for teachers apply so well to curriculum planning and can inspire you to be a change agent in students' lives—and part of a faculty that embraces the idea that visible teaching is a continual evaluation of one's impact on student's learning. "Teachers, it's time we embrace the evidence, update our classrooms, and impact student learning in wildly positive ways," say Doug, Nancy, and John. So let's see *Visible Learning for Literacy* for what it is: the book that renews our teaching and reminds us of our influence, just in time.
