The Year of Learning Dangerously *Penguin*

Think homeschooling is only for a handful of eccentrics on either end of the political spectrum? Think again. Today in America, two million primary- and secondary-school students are homeschooled. Growing at a rate of 10 percent annually, homeschooling represents the most dramatic change in American education since the invention of the mimeograph—and the story has only just begun. In *The Year of Learning Dangerously*, popular blogger, author, and former child actor Quinn Cummings recounts her family's decision to wade into the unfamiliar waters of homeschooling—despite a chronic lack of discipline, some major gaps in academic knowledge, and a serious case of math aversion. (That description refers to Quinn.) Trying out the latest trends, attending key conferences (incognito, of course), and recounting the highlights and lowlights along the way, Quinn takes her daughter's education into her own hands, for better and for worse. Part memoir, part social commentary, and part how-not-to guide, *The Year of Learning Dangerously* will make you laugh and make you think. And it may or may not have a quiz at the end. OK, there isn't a quiz. Probably.

The Brave Learner *Penguin*

Publishers Weekly bestseller · A joyful and accessible homeschool guide to making learning a part of everyday life Parents who are deeply invested in their children's education can be hard on themselves and their kids. When exhausted parents are living the day-to-day grind, it can seem impossible to muster enough energy to make learning fun or interesting. How do parents nurture a love of learning amid childhood chaos, parental self-doubt, the flu, and state academic standards? In this book, Julie Bogart distills decades of experience--homeschooling her five now grown children, developing curricula, and training homeschooling families around the world--to show parents how to make education an exciting, even enchanting, experience for their kids, whether they're in elementary or high school. Enchantment is about ease, not striving. Bogart shows parents how to make room for surprise, mystery, risk, and adventure in their family's routine, so they can create an environment that naturally moves learning forward. If a child wants to pick up a new hobby or explore a subject area that the parent knows little about, it's easy to simply say "no" to end the discussion and the parental discomfort, while dousing their child's curious spark. Bogart gently invites parents to model brave learning for their kids so they, too, can approach life with curiosity, joy, and the courage to take learning risks.

Rethinking School: How to Take Charge of Your Child's Education *W. W. Norton & Company*

"If you read only one book on educating children, this should be the book.... With a warm, informative voice, Bauer gives you the knowledge that will help you flex the educational model to meet the needs of your child." —San Francisco Book Review Our K-12 school system isn't a good fit for all—or even most—students. It prioritizes a single way of understanding the world over all others, pushes children into a rigid set of grades with little regard for individual maturity, and slaps "disability" labels on differences in learning style. Caught in this system, far too many young learners end up discouraged. This informed, compassionate, and practical guidebook will show you how to take control of your child's K-12 experience and negotiate the school system in a way that nurtures your child's mind, emotions, and spirit. Understand why we have twelve grades, and why we match them to ages. Evaluate your child's maturity, and determine how to use that knowledge to your advantage. Find out what subject areas we study in school, why they exist—and how to tinker with them. Discover what learning disabilities and intellectual giftedness are, how they can overlap, how to recognize them, and how those labels can help (or hinder) you. Work effectively with your child's teachers, tutors, and coaches. Learn to teach important subjects yourself. Challenge accepted ideas about homework and standardized testing. Help your child develop a vision for the future. Reclaim your families' priorities (including time for eating together, playing, imagining, traveling, and, yes, sleeping!). Plan for college—or apprenticeships. Consider out-of-the-box alternatives.
