While other diesel injection systems

generate the fuel pressure for each injection separately, the Common Rail System separates pressure generation and injection from one another. The fuel is constantly available at the pressure required for injection. The Common Rail System is modular in design. The right combination of high-pressure pump, injectors, rail and electronic control unit results in systems for all types of engine.

Common Rail Systems, Bosch Common Rail Systems

The high-pressure pump CP4 delivers the fuel into the connected rail under high pressure. The CP4 consists of one or two high-pressure elements, each

integrated in a housing with its own camshaft. The pump camshaft is driven by belts, chains, or cogwheels and moves the pump pistons to generate the required high pressure.
