Here's the truth behind the UK's biggest recycling myths

...

The recycling of paper is the process by which waste paper is turned into new paper products. It has a number of important benefits: It saves waste paper from occupying homes of people and producing methane as it breaks down. Because paper fibre contains carbon, recycling keeps the carbon locked up for longer and out of the atmosphere. Around two-thirds of all paper products in the US are now recovered and recycled, although it does not all become new paper. After repeated processing the fibres

Paper recycling - Wikipedia

Tear the toilet paper into small pieces and place them into the water. Beat the mixture with a fork or a blender until the paper is broken down into fibers. Pour the mixture into the cake pan. Make a frame from the screen by folding the edges over. Slide the frame into the pan from the side so it is under the fibers.
