Network Rail A Guide to Overhead Electrification

In the wake of the electrification of Tyneside by the NER, this coal-carrying line was electrified between 1 July 1915 and 1

January 1916 as a planned precursor to electrifying NER's busy York to Newcastle main line (part of the East Coast Main Line). The LNER removed this electrification system in 1935 (between 7 January and 8 July); the decline in the coal market making it economically unfeasible to undertake the significant renewals required to continue electric operation.

Railway electrification in Great Britain - Wikipedia

The new NR Series 1 overhead line equipment, designed and manufactured by Furrer+Frei, is a TSI compliant OLE design specified to allow multiple pantograph operation at 140 mph operation and is being installed using Amey plc's High Output Plant System (HOPS) and other conventional techniques. This is designed to allow Adjacent Line Operation (ALO) where works can be carried out while trains operate on adjacent tracks.
