Unlocking Creativity in Solving Novel Mathematics Problems

Cognitive and Non-Cognitive Perspectives and Approaches *Routledge*

Unlocking Creativity in Solving Novel Mathematics Problems delivers a fascinating insight into thinking and feeling approaches used in creative problem solving and explores whether attending to 'feeling' makes any difference to solving novel problems successfully. With a focus on research throughout, this book reveals ways of identifying, describing and measuring

‘feeling’ (or ‘intuition’) in problem-solving processes. It details construction of a new creative problem-solving conceptual framework using cognitive and non-cognitive elements, including the brain’s visuo-spatial and linguistic circuits, conscious and non-conscious mental activity, and the generation of feeling in listening to the self, identified from verbal data. This framework becomes the process model for developing a comprehensive quantitative model of creative problem solving incorporating the Person, Product, Process and Environment dimensions of creativity. In a world constantly seeking new ideas and new approaches to solving complex problems, the application of this book’s findings will revolutionize the way

students, teachers, businesses and industries approach novel problem solving, and mathematics learning and teaching.

Management Skills in Primary Schools *Routledge*

Originally published in 1988. The qualities that identify a good school are high teaching standards and teacher morale, good levels of behaviour, successful pupil performance and a well-balanced provision of extra-curricular activities. Such schools are described as 'well-run' but the correlation between effectiveness and an explicit management strategy is not yet established. This book seeks to examine the role of management in the primary school and to identify those areas in which effective management practice can make a valuable contribution to school life for the benefit of both staff

and pupils. It argues that although useful insights can be gained into school organisation from the scientific management perspective, the human relation approach to management has more to offer to those working in the primary sector. The focus is therefore on personal relationships. The importance of a clear sense of purpose is emphasised throughout, especially in view of the challenges which now face our primary schools.
