Example Structured Home Wiring Project 1

Structured wiring for home automation
and home networking is a new
technology. The term "structured" is
derived from the construction of a cable
assembly of several cable types. The
bundle is wrapped with a spiral nylon
rope or encased in a material such as
polypropylene. The assembly comprises
two RG-6 and two Category 5 cables.

Planning A Residential Structured Cabling System

How to Plan a Structured Cabling Project

The first step is to lay out all the systems you want integrated into the home. Work backwards: start with the applications you want in every room, then plan for the wiring to support them.

A Truly Connected Home Begins with Structured Cabling

Backbone cabling. From the entrance facility, the structured cabling network branches out to other buildings, as well as from floor to floor within a building on the backbone cabling system. We use the term backbone to describe the cables handling the major network traffic.
