Images, real and virtual Real images are those where light actually converges, whereas virtual images are locations from where light appears to have converged. Real images occur when objects are placed outside the focal length of a converging lens or outside the focal length of a converging mirror. A real image is illustrated below.

Images, real and virtual

From perception to reality The message common to the photographs is that every image (of the world), be it “natural” or “artificial”, is a construction. This concept of construction and reconstruction also appears in some contemporary theories that examine the process whereby reality arises out of perception in the human consciousness.

From image to reality - CCC Strozzina

Virtual reality refers to a simulation generated by a computer which allows user interaction with the use of special headsets. In simple words, it is an alternative reality created by a computer and the headset allows a person to be immersed in that reality. According to Allied Market Research, the VR content creation market would reach more than \$45 billion by 2026.

A-Frame : Virtual Reality for the Web | Creating 3D models ...

It seems to me that if absolute reality is the ultimate goal, then an image is defined by the technical capacity of the photographer, the prevailing weather conditions, and the only aspect that reflects the artistic vision of the photographer is the choice of composition.
