...
The device can

measure glucose in the interstitial fluid under the skin of the arm by using a polymer that fluoresces in response to the levels of glucose. The data is then sent to a transmitter that displays the glucose levels in real time. The device received FDA approval in 2018 and the company struck a deal with Roche to distribute the sensor.

Screen size is measured diagonally from bottom to top. So when a computer

monitor has, for instance, a 19 inch screen, it means the diagonal measurement from bottom left to top right (or bottom right to top left) is 19 inches. Modern day computer monitors come in a range of different screen sizes, from 19 inches right up to 27 inches and bigger.
