Review of Visual Complex Analysis, by Tristan Needham

I find that because of Needham's mainly visual approach it is a good idea always to look for simple ways to solve the exercises. That's what he is looking for in my opinion. Looking at $|z-c|=R$ made me think of circles because I know that c and R are often used as centre and radius of circles, and also this equation reads to me as:

Complex analysis is the area of mathematical analysis that looks at functions on the complex numbers.It has a wide range of uses, including algebraic geometry and analytic number theory, and areas of physics, such as string theory and quantum mechanics. Augustin-Louis Cauchy is normally credited with founding complex analysis, building on the work of Gauss and Euler.
