You'll Get Through This *Thomas Nelson*

You'll get through this. It won't be painless. It won't be quick. But God will use this mess for good.

Don't be foolish or naïve. But don't despair either. With God's help, you'll get through this. You fear you won't make it through. We all do. We fear that the depression will never lift, the yelling will never stop, the pain will never leave. In the pits, surrounded by steep walls and aching reminders, we wonder: Will this gray sky ever brighten? This load ever lighten? In *You'll Get Through This*, pastor and New York Times best-selling author, Max Lucado offers sweet assurance. "Deliverance is to the Bible what jazz music is to Mardi Gras: bold, brassy, and everywhere." Max reminds readers God doesn't promise that getting through trials will be quick or painless. It wasn't for Joseph--tossed in a pit by his brothers, sold into slavery, wrongfully imprisoned, forgotten and dismissed--but his Old Testament story is in the Bible for this reason: to teach us to trust God to trump evil. With the compassion of a pastor, the heart of a storyteller, and the joy of one who has seen what God can do, Max explores the story of Joseph and the truth of Genesis 50:20. What Satan intends for evil, God redeems for good.

When Your Soul Aches *WaterBrook*

Help and Hope for a Widow's Heart In the weeks and months following the loss of her husband, a widow may be numb with shock--or feel overwhelmed by a wide range of heartrending, and at times conflicting, emotions. Regardless of her response, she needs to know that she can and will make it through this difficult time. And she needs to know that--no matter how it feels--she is not alone. More than two decades ago, author Lois Mowday Rabey experienced firsthand the confusion and devastation that follows a husband's death. When *Your Soul Aches* is an intimate collection of inspiration and insights born of that journey through grief. Every woman who has been rocked by the loss of her partner will find relief in Rabey's vulnerable and touching account of her real-life experiences and those of dozens of other widows. Every widow's pain is unique. So are her circumstances and her experience. Yet she shares many questions and concerns with other women who have lost their husbands--ones that may be best addressed with the help of those who have previously walked through the fire. Such is the help found in the pages of *When Your Soul Aches*. Written by a widow who remained single for ten years while raising her two daughters, it offers invaluable guidance to women facing the painful emotions and difficult challenges of widowhood. Compassionate, empathetic, and wise, this book gently encourages those grieving the loss of their husbands to be honest about their feelings. Rewire Your Anxious Brain *New Harbinger Publications*

Do you ever wonder what is happening inside your brain when you feel anxious, panicked, and worried? In Rewire Your Anxious Brain, psychologist Catherine Pittman and author Elizabeth Karle offer a unique, evidence-based solution to overcoming anxiety based in cutting-edge neuroscience and research. In the book, you will learn how the amygdala and cortex (both important parts of the brain) are essential players in the neuropsychology of anxiety. The amygdala acts as a primal response, and oftentimes, when this part of the brain processes fear, you may not even understand why you are afraid. By comparison, the cortex is the center of “worry.” That is, obsessing, ruminating, and dwelling on things that may or may not happen. In the book, Pittman and Karle make it simple by offering specific examples of how to manage fear by tapping into both of these pathways in the brain. As you read, you’ll gain a greater understanding how anxiety is created in the brain, and as a result, you will feel empowered and motivated to overcome it. The brain is a powerful tool, and the more you work to change the way you respond to fear, the more resilient you will become. Using the practical self-assessments and proven-effective techniques in this book, you will learn to literally “rewire” the brain processes that lie at the root of your fears.

The Woman Who Cracked the Anxiety Code *Scribe Us*

The true story of the little-known mental-health pioneer who revolutionized how we see the defining problem of our era: anxiety. Panic, depression, sorrow, guilt, disgrace, obsession, sleeplessness, low confidence, loneliness, agoraphobia...The international bestseller Hope and Help for Your Nerves, first published in 1962 and still in print, has helped tens of millions of people to overcome all of these, and continues to do so. Yet even as letters and phone calls from readers around the world flooded in, thanking her for helping to improve--and in some cases to save--their lives, Dr Claire Weekes was dismissed as underqualified and overly populist by the psychiatric establishment. Just who was this woman? Claire Weekes was driven by a restless and unconventional mind that saw her become the first woman to earn a Doctor of Science degree at Australia's oldest university, win global plaudits for her research into evolution, and take a turn as a travel agent, before embarking on a career in medicine. But it was a mistaken diagnosis of tuberculosis that would set her heart racing and push her towards integrating all she'd learned into a practical treatment for anxiety--a tried-and-true method now seen as state-of-the-art 30 years after her death. This book is the first to tell her remarkable story.

She paints a powerful picture of the challenge of dealing with claustrophobia on a daily basis, looking at how people manage, whether it is possible to overcome the anxiety, and what others can do to help friends, family and colleagues to cope. She even manages to find the humour in what can be a truly frightening experience, and controversially, presents claustrophobia not simply as an irrational response, but as a deeply human rejection of being electronically controlled in the confined spaces of an increasingly technological world. She also claims that many businesses are losing customers through not understanding people's fear of confined spaces ...
