Radio Receiver Design - Listener's Guide

Radio receivers A radio receiver is the opposite of a radio transmitter. It uses an antenna to capture radio waves, processes those waves to extract only those waves that are vibrating at the desired frequency, extracts the audio signals that were added to those waves, amplifies the audio signals, and finally plays them on a speaker.

Radio Electronics: Transmitters and Receivers - dummies

The receiver uses electronic filters to separate the desired radio frequency signal from all the other signals picked up by the antenna, an electronic amplifier to increase the power of the signal for further processing, and finally recovers the desired information through demodulation. Of the radio waves, FM is the most popular one.

FM Receiver | Electronics Circuit with Full Explanation

The first radio receivers were crystal sets, and became available in the 1920's with the opening of Marconi's first broadcast station in Chelmsford. A crystal set does not have a battery. It runs completely from the energy extracted from radio waves it picks up from the antenna. A resonant LC (or tuned) circuit coupled to a large aerial or antenna was used. Many amateur experimenters ...

A Simple Radio Receiver

Good book overall, the topic is a bit misleading, it is not the whole story of radio receiver design, I also dislike wastefulness and the firs chapter is just that, anyone that is going into receiver design should not need such an elementary discussion of radio concepts or electronics for that matter. but I like the rest of the book, pertinent clear mathematics on Image frequency, intermodulation and a lot of other nuances that are essential to understand radio receiver systems.

Unless you are sitting right beside the transmitter, your radio receiver needs an antenna to help it pick the transmitter's radio waves out of the air. An AM antenna is simply a wire or a metal stick that increases the amount of metal the transmitter's waves can interact with. Your radio receiver needs a tuner. The antenna will receive thousands of sine waves. The job of a tuner is to separate ...
