The elements of the NIOSH's occupational toxicology program can be presented in terms of its public health mission. The basic four elements of a public health program for occupational illness prevention are as follows: '3' 1. Identification of occupational safety and health problems so as to detect and define

Occupational Toxicology: NIOSH Perspective

Occupational toxicologists assess the hazards and risks to health

posed by chemicals encountered in the workplace. Many of the chemicals that occupational toxicologists must deal don't cause an appreciable risk to health when they are present at low levels in food, consumer products and the environment. However, workers may be exposed to these chemicals at considerably higher levels than the general public, so the consequences of human exposure are potentially the most serious in the work ...

OCCUPATIONAL TOXICOLOGY » British Toxicology Society

Toxicology is the science of adverse effects of chemical substances on living organisms. Living organisms include the algae in the sea, animals and people, all flora and fauna. There are no safe substances, all chemicals can be poisonous and cause injury or death. But they can be used safely: the effect depends on the dose and exposure.

TOXICOLOGY - International occupational safety & health

...

Occupational (or industrial) toxicology is the application of the principles and methodology of toxicology to understanding and managing chemical and biological hazards encountered at work. The objective of the occupational toxicologist is to prevent adverse health effects in workers that arise from exposures in their work environment.
