As nouns the difference between logic and reality is that logic is (uncountable)

a method of human thought that involves thinking in a linear, step-by-step manner about how a problem can be solved logic is the basis of many principles including the scientific method while reality is the state of being actual or real. As an adjective logic

Logic vs Reality - What's the difference? | WikiDiff

A scientific model is a simplified abstract view of a complex reality. A scientific model represents empirical objects, phenomena, and physical processes in a logical way. Attempts to formalize the principles of the empirical sciences use an interpretation to model reality, in the same way logicians axiomatize the principles of logic.
