Case-Based Reasoning

Case-based reasoning (CBR) research in artificial intelligence (see also Problem Solving and Reasoning: Case-based) is concerned with the use of remembered prior experiences in analyzing new situations and solving problems. The distinguishing characteristic of case-based reasoning is that prior

experiences are stored as distinct histories or 'cases,' in contrast to other AI reasoning frameworks where knowledge (however acquired) is integrated into a unified structure of logical rules ...

Case Based Reasoning - an overview | ScienceDirect Topics

Case-based reasoning (CBR) is an experience-based approach to solving new problems by adapting previously successful solutions to similar problems. Addressing memory, learning, planning and problem solving, CBR provides a foundation for a new technology of intelligent computer systems that can solve problems and adapt to new situations.

What is Case-Based Reasoning (CBR)? Definition from WhatIs.com

Case-based reasoning means using old experiences to understand and solve new problems. In case-based reasoning, a reasoner remembers a previous situation similar to the current one and uses that to solve the new problem. Case-based reasoning can mean adapting old solutions to meet new demands; using old

An Introduction to Case-Based Reasoning*

Case-based reasoning, broadly construed, is the process of solving new problems based on the solutions of similar past problems. An auto mechanic who fixes an engine by recalling another car that exhibited similar symptoms is

using case-based reasoning. A lawyer who advocates a particular outcome in a trial based on legal precedents or a judge who creates case law is using case-based reasoning. So, too, an engineer copying working elements of nature, is treating nature as a database of solutions
