The GDV diagnostic system is based on stimulating and recording 40 ms of the electro-photonic glow around all ten fingertips, one at a time. Using clinically verified charts, it is possible to determine, not only what happens in the human body, but also where it happens – by examining specific sectors of the electro-photonic glow.

Electrophotonic Analysis in Medicine - DrK Lab

Bio-Well GDV Camera is able to extract free electrons from the tissue of the human fingertip by applying very short

electromagnetic impulses to the glass electrode of the device. These electrons create the gas discharge in the air around the finger, which is being photographed by the Bio-Well device with the use of the in-built video-camera.
